

Location enabling the next generation of Worksites.

GEO PLATFORM

PRODUCTIVITY

HEALTH SOLUTIONS

INCREASE PRODUCTIVITY AND SAFETY THANKS TO AUTOMATED PROCESSES

Whether the activity is above or under ground, with thousands of team members and assets spread on the worksite for 2 shifts a day, who can tell where everyone and everything is located, in real-time?

GeoMoby can.

AUTOMATED TIMESHEETS

CONTACT TRACING

A leading provider of integrated services in Australia and New Zealand entrusted GeoMoby™ with the mission to creating and delivering geolocation solutions to address productivity and safety concerns.

Strong in many years of expertise in live location technologies, GeoMoby™'s came up with the following key solutions:

- monitor thousands of their team members' movements, to set up automated timesheets and update payroll system accordingly,
- define highly accurate geofences (outdoor) and micro-fences (indoor), outlining specific restricted areas to trigger alerts when crossed,
- geolocate staff in real-time and gather location data to establish contact tracing in case of a Covid-19 or any infectious disease outbreak.

Safety monitoring of what is happening on-site, at all times, keeping you informed in an efficient way.

Setting-up geofences to **detect movement and trigger actions** when entering/exiting predefined areas.

Monitor assets and teams' movements, with the GeoMoby™ live platform and **alert them in real-time**.

Generate aggregated data sent to our client's Business Intelligence tools allowing them to manage their team's productivity and **automate timesheets**.

Advanced Live tracking technologies

The next generation of geofencing technologies allowing **very high precision** detection both indoors & outdoors with a negligible impact on the device battery.

Why Us?

GeoMoby™ spent years in R&D, achieved **20 times better geofencing accuracy** than industry standards and delivered innovative **cross-environment live-tracking intelligence**.
